

# THE CISCO 360 LEARNING PROGRAM

## Expert Level Training for CCIE Voice

The Cisco® 360 Learning Program for CCIE Voice is the smart way to help ensure your IT staff is equipped with the latest skills and knowledge to support your sophisticated network. The program offers a comprehensive, blended-learning curriculum designed to accelerate competency and build the skills necessary to identify and tackle the various types of expert-level Voice-over-IP (VoIP) configuration and troubleshooting challenges that appear in the rigorous CCIE Voice Lab Exam as well as in real-life networks.

Global Knowledge is one of the few Cisco Learning Partners that have achieved accreditation to deliver the Cisco® 360 Learning Program in both Routing and Switching and Voice. Over the last year we have delivered to delegates across Europe, the Middle East and the United States as well as having trainers that are recognized at a worldwide level for their expertise.

### THE PROGRAM

The Cisco 360 Learning Program for CCIE® Voice provides network engineers who have three to five years of experience with an effective, job-relevant, and proven program to build expert-level skills and to prepare for the rigorous Cisco CCIE Voice certification exams.

This is an intensive and immersive program which is likely to take between six months to a year to complete depending on your level of expertise. The program will elevate your command of technical topics and help you develop the skills necessary to tackle the types of expert-level Voice-over-IP (VoIP) configuration and troubleshooting challenges that appear in real-life networks and in the CCIE Voice Lab Exam.

Authorized by Cisco this unique program incorporates a 360-degree approach to learning, combining expert-level curriculum with current realistic lab scenarios and ensures that the content always mirrors the latest exam blueprint.

### BLENDED LEARNING PROCESS

The Cisco 360 Learning Program for Voice encompasses six stages of activity to support successful learning for students:

- 1. Assessment:** Students take a diagnostic pre-assessment lab to benchmark their knowledge of various networking topics.
- 2. Planning:** Based on the pre-assessment, students create a learning plan that uses a mix of learning components to focus their study.
- 3. Learning:** Students learn by participating in lessons and lectures, reading materials, and working with peers and instructors.
- 4. Practice:** Students use the practice exercises to apply learning on actual network equipment.
- 5. Mastery:** Students measure their understanding by completing assessments of knowledge and skill for various approaches to solving network problems.
- 6. Review:** Students review their work with a mentor or instructor and tune their skills with tips and best practices.
