

Symantec Network Access Control 11 - Troubleshooting & Enforcers

Dauer: 1 Tag Kurscode: SYM783

Kursbeschreibung:

This course covers the SNAC 6100 series appliance hardware, installation and configuration, and accessing the command line interface (CLI). Additionally the course covers troubleshooting enforcer problems, capture and debug commands, and the debug logs.

Zielgruppe:

This course is intended for all technical support engineers, systems engineers, and consultants who will be supporting the Symantec Network Access Control 11.0 products

Kursziele:

- Upon completion of the course, students will be able to:
 - Describe the basic enforcer appliance hardware and software components
 - Restore an enforcer appliance image and access the appliance setup wizard
 - Reset an enforcer appliance to a factory default condition
 - Access the enforcer command line interface
 - Configure an enforcer via a serial connection, using the command line interface
 - Verify manager connectivity using the command line interface
 - Verify enforcer status in the SEPM/SNAC manager
 - Verify enforcer registration in a SEPM or SNAC manager (logs)
 - Describe basic communication that occurs between clients, each type of enforcer, and a manager
 - Use the CLI capture commands to isolate and capture client authentication traffic
 - Use the CLI capture upload command to transfer information to client machines
 - Use the CLI debug commands to enable debugging and obtain debug information
 - Review client logs to verify HI validation and enforcer authentication
 - Access the Linux kernel running on enforcer appliances
 - List three of the enforcer system configuration files
-

Voraussetzungen:

Symantec Network Access Control 11.0 – Fundamentals

The above Pre-reqs can be located here on PartnerNet: [PartnerNet Training Paths](#) .

Folgekurse:

Symantec Network Access Control 11.0 - Advanced

Schulungsinhalt:

Lesson 1 - Overview of Enforcers

- SNAC 6100 Enforcer Hardware Re-imaging the Enforcer appliance Resetting the Enforcer appliance Accessing the Command Line Interface

Lesson 2 - Installation and Appliance Configuration

- Appliance Configuration Additional Management Commands Enforcer Registration and Basic Settings Labs

Lesson 3 - Capturing Network Traffic

- Enforcer Communication Capture Commands Interpreting Captured Data Labs

Lesson 4 - NetBackup 6.0 Catalog Backups and Recovery

- NetBackup 6.0 Catalog Backups and recovery Debug Commands Debug Files Enforcer Logging Labs

Lesson 5 - NetBackup 6.0 Internals and Support

- Accessing Linux Significant Directories and Files Labs
